# Presentation to the Health Care Learning Institute

East Central Michigan RSA for Health Care

Power of Collaboration in Health Care - June 6, 2007

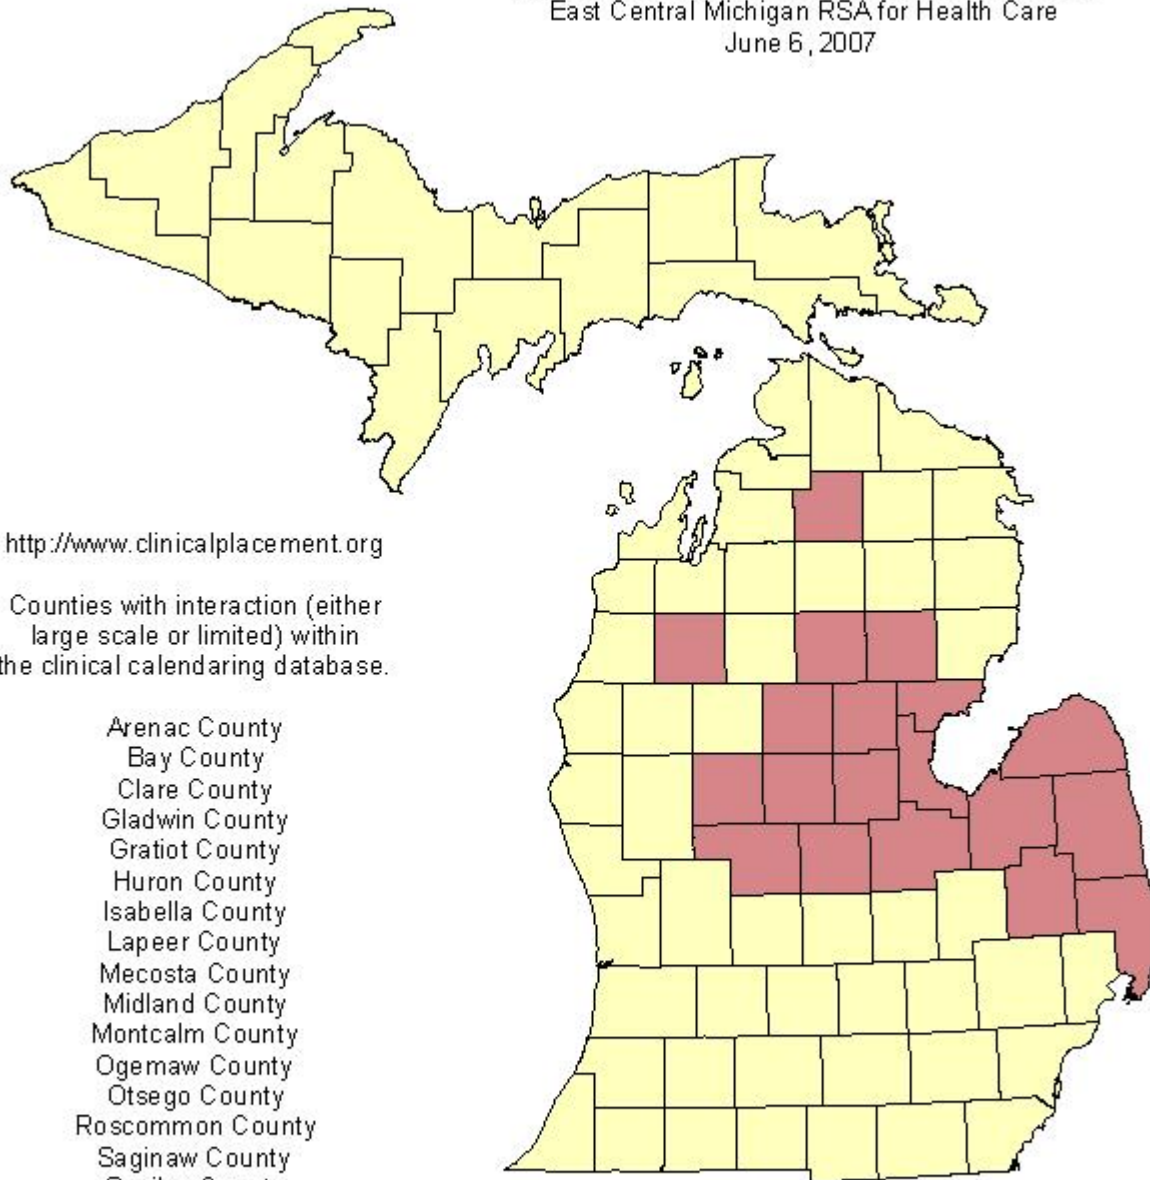

## About the Workgroup

The East Central Michigan RSA for Health Care was formed by the Saginaw, Midland, Bay Michigan Works and consists of:

- Health care employers – including hospitals and long-term care facilities
- Colleges, universities and training providers
- Organizations spanning 19 counties within Michigan that have involvement within the database. See the map on the next page.

The workgroup was formed to tackle the demanding problems within the health care industry. *Clinical scheduling in Nursing* was just one item that was identified as being an important area for improvement.

Counties with interaction (either large scale or limited) within the clinical calendaring database.

Arenac County  
Bay County  
Clare County  
Gladwin County  
Gratiot County  
Huron County  
Isabella County  
Lapeer County  
Mecosta County  
Midland County  
Montcalm County  
Ogemaw County  
Otsego County  
Roscommon County  
Saginaw County  
Sanilac County  
St. Clair County  
Tuscola County  
Wexford County

Power of Collaboration in Health Care - June 6, 2007

## Initial Study and Report

A national study of the clinical placement bottleneck was completed as a first step in this project. Many systems, workgroups, consortiums and processes were studied.

The results identified that the automation of Clinical Scheduling produces a 10-20% increase in clinical opportunities.

As a result of this study and many workgroup member comments, a request for proposal for a *clinical scheduling and calendaring database* was developed. Spicer Group responded to the RFP and joined the workgroup as a development partner in November 2005.

## Automating clinical scheduling increases clinical opportunities.

### Why?

New clinical opportunities and requests get posted within the system by the scheduler.

*Quickly gets the word out to everyone.*

*Identifies areas that are underutilized.*

Saves our schedulers an enormous amount of time.

*More time allows increase in research, planning and communication.*

*More time allows for innovative ideas.*

*More time increases the possibilities of new clinical opportunities.*

Power of Collaboration in Health Care - June 6, 2007

## Software Features

The project development partners spent considerable time and effort in planning a system that met the needs of all of the workgroup members.

The most important features identified within the system include:

- 100% Internet-based
- Communications Portal
- Guest Area – Sharing of Data
- Printable as Calendars or Spreadsheets
- Calculation of Clinical Contact Hours
- Real-Time Editing and Sharing of Data
- Identifying Open Clinicals
- Identifying Clinical Requests
- Export of all data for independent use

## 100% Internet Based

The clinical calendaring software is located at

<http://www.clinicalplacement.org>

Recent program expansion allows for other workgroups / consortiums within the state or nation to be added

System utilizes web based technology

Secured properly and can be accessed anywhere with an Internet connection

---

## Guest Area for Data Sharing

---

### Communications Portal

Contact Information (email, phone and fax)  
for:

*Health Care Partners*

Workgroup Members  
Department / Unit Managers

*Educational Partners*

Workgroup Members  
Instructors

*Project Development Partners*

Technical Support Information

### Document Library

Printable PDF Reports of:

Clinical Calendar PDF  
Clinical Spreadsheet (Daily List View)

### Calendar Filtering

Five step process for advanced calendar  
filtering.

---

## Calendar System

---

- Calendar of data includes several different graphic layouts, including:
  - Monthly
  - Weekly
  - Daily
  - Table / Spreadsheet
  
- Calendar is real-time / instant:
  - Changes and updates of data are instant.
  - Workgroup members are in complete control of their own data and updates.
  - Health Care Partner enters the clinical events (meeting dates, number of students, etc.).
  - Educational Partner fills in half the data (instructor, course, etc.).

## Internet Based System for Clinical Placement

Home Page  
[clinicalplacement.org](http://clinicalplacement.org)

User Name:

Password:

The clinical placement calendaring system at [www.clinicalplacement.org](http://www.clinicalplacement.org) is a 100% Internet based calendaring and scheduling system. This system has been embraced by numerous health care employers - including hospitals and long-term care facilities - and colleges, universities and training providers.

### It gets to the root cause of a problem!

Clinical training completion is the most significant barrier to creating and maintaining a strong nurse workforce in this region.

### It streamlines what can be an inefficient process!

The automated clinical placement calendar serves employers with increased efficiency and better utilization of resources.

### It produces results!

Across the nation, where there has been a clinical placement calendar implemented, they have seen a 10-20% increase in clinical placements over time.

### Features

- Web based and real time
- Easily expandable to add clinical sites, schools, colleges and occupations
- Provides calendar of clinical slots
- Automated requests for clinical slots
- Notification of clinical slot availability
- Communications portal for workgroup members
- Document library of reports
- Simplified data entry screens

## Table View of Calendar Data

How contact hours are calculated within the system:

A. Time of Clinical:  
1400-2130 = 7.5 Hours

B. Number of Days  
Clinical Event Meets = 14

C. Number of Students = 10

A + B + C = Contact Hours  
7.5 x 14 x 10 = 1050 Contact Hours

## Internet Based System for Clinical Placement

#### Recent News:

*May 2007*

Spicer Group enhances the system to allow for multiple workgroups to join in from across the State of Michigan and nationally.

*June 2006*

A users manual has been generated and will be distributed to workgroup members. Updates are available by following this link to the [users manual](#).

*November 2005*

East Central Michigan Health Care Regional Skills Alliance partners with Spicer Group for system programming.
